In order to facilitate research, the College has purchased the **CMIE Prowess database**.
A **workshop** was organized for interested faculty members on **25th November, 2021** in
physical mode in the College to get hands-on training on **ProwessIQ application** which
accesses the Prowess database. The resource person for the same was **Ms. Pratima Dua**,
Business Relationship Manager at CMIE for the educational and research segment (ENR). She
is an expert in CMIE's financial databases on the Indian economy and corporate sector.

ProwessIQ is an interactive querying system to find companies from the Prowess database.
The Prowess database consists of the financial performance of Indian companies. The
database contains information on all listed companies and a larger set of unlisted companies.
The database is built from the audited Annual Reports of companies and information submitted
to the Ministry of Company Affairs; and in the case of listed companies, the database also
includes company filings with stock exchanges and prices of securities listed on the major stock
exchanges.

In the workshop, Ms. Pratima gave a detailed demonstration of the installation of ProwessIQ
and querying the Prowess database. The faculty learnt about querying the database aimed at
finding companies that match a given set of search conditions. Display of query results in
spreadsheets and the further use of the results of queries were also discussed. Queries from
the faculty members were simultaneously taken and answered.
